CAREER OBJECTIVE

Aspiring frontend developer with a solid foundation in HTML5, CSS3, JavaScript and React JS. Eager to contribute creativity and technical skill to a dynamic development team. Adapt at translating design components into responsive and user-friendly interfaces. Seeking an entry level position to apply and enhance my frontend development expertise while continuously learning and growing in a collaborative and innovative environment.

EDUCATION

BACHELOR OF ENGINEERING

Kamaraj College of Engineering and Technology

2016 - 2020

HIGHER SECONDARY

ST Francis Matric Higher Secondary School

2014-2016

CERTIFICATION

Certification in Frontend Development

Profenna Technologies, Tirupur

Skills acquired: HTML, CSS, JavaScript, Bootstrap, React JS

PROJECTS

ZOMATO Clone

A Zomato clone site using HTML and CSS would involve creating a web page with a similar layout and design to the original Zomato site. Used HTML for structuring the content, and CSS for styling elements like navigation bars, cards for restaurant information, and overall page layout. Media queries in CSS used for responsiveness for various devices.

PORTFOLIO

A Portfolio using React JS involves building a dynamic and responsive website to showcase your skills and projects. React components are used to structure the content, such as an about section, skills, contact details. Leverage React router for navigation between different sections. State management for dynamic content, and conditional rendering for a personalized and engaging user experience. CSS for styling and consider incorporating animations or transitions to enhance the visual appeal. And I uploaded it in my Git hub.

DECLARATION

I hereby declare that the details furnished is true to the best of my knowledge.
